SUMMARY

Senior AI Engineer and Architect with 5+ years across agentic AI platforms, distributed backend systems, and consumer payments. Owns **Nova** end to end at GoComet, a greenfield agentic AI platform targeting 50 major enterprise customers. Previously shipped Wallet, Payments, and Bills features on Gojek/Gopay serving **37M+ DAU**, and developed ODBC/JDBC drivers in insightsoftware's Simba portfolio used at Google, Microsoft, Snowflake, and 15K+ Databricks customers.

EXPERIENCE

GoComet, Bengaluru, India

Mar 2026 – Present

Senior AI Engineer and Architect, Nova Agentic AI Platform

- Own **Nova** end to end: GoComet's greenfield **agentic AI platform** (LLM planner/executor loops, tool use, **ClickHouse** analytics, **DataHub** for context, eval harnesses, safety rails) enabling enterprise clients and **Forward Deployed Engineers** to autonomously build and operate supply-chain automations; targeting **50 major enterprise customers** including Unilever, Honda, Tata Motors, and Schneider Electric.

Gojek / GoTo / GoTo Financial, Bengaluru, India

Aug 2022 – Feb 2026

Software Engineer II, Consumer Payments, Bills and Wallet

Jan 2025 – Feb 2026

Software Engineer, Consumer Payments and Wallet

Aug 2022 – Dec 2024

- Led backend features on Gojek and Gopay (**37M+ DAU**) in close collaboration with teams across Indonesia, Singapore, and China; mentored **2 junior engineers**, owned production on-call, and instrumented Server-Driven UI organisms with **clickstream-based telemetry** tracking per-organism impression and engagement rates, iterating on content and placement to grow Wallet-surface impressions **from 95M to 590M/month (6.2x, 2x above projection)**.
- Fully owned the **e-money virtual-card backend** on Gopay: NFC balance check, NFC top-up, and offline-loaded card management integrated with Indonesia's transit ecosystem (TransJakarta, MRT, LRT, Kereta Commuter; **~11M+ monthly transit transactions** in Greater Jakarta).
- Architected the **Split Bill** system end to end: **15+ APIs** covering **OCR** receipt parsing, per-item assignment, automatic and manual settlement, 4 draft flows, and standard create/get/update/discard, with new-user backfill for acquisition; **17K+ splits created/day** drive many multiples of that in downstream API traffic.
- Built a from-scratch **Promotions and Discounting engine** powering **15M+ daily transactions** (voucher allocation, promo codes, direct cashbacks) with an embeddable SDK and self-serve back-office portal.
- Contributed to the **Bills platform** re-architecture (reminder and autopay engines, biller and supplier onboarding) for recurring utility, telco, and subscription payments.
- Built the **async post-processing pipeline** for the Order Management System, handling **80K+ events/minute** via Go and Kafka-based event-driven workers.
- Scaled Nearby merchant discovery to **p99 latency of 15 ms over 4M+ documents (~8 TB)** in **Elasticsearch**.
- **Won company-wide hackathon (Oct 2024)** by shipping a 4-component merchant digitization product (Dukaan-style) enabling SMBs to launch digital storefronts end to end.

insightsoftware, Bengaluru, India

Jan 2021 – Jul 2022

Software Engineer, Simba Data Connectivity Platform

- Developed production **ODBC/JDBC drivers** in Simba's portfolio of **60+ connectors** powering mission-critical analytics at Google, Microsoft, Snowflake, and 15K+ Databricks customers.
- Shipped performance, protocol-compliance, and SQL-translation improvements across Big Data (Spark, Trino, Presto) and NoSQL (MongoDB, Cassandra) data sources.

PROJECTS AND OPEN SOURCE

- **Milligrep** (*Rust*): published an opinionated, simplified grep alternative to crates.io; docs.rs/crate/milligrep.
- **Refined GitHub**: contributed toast-state progress UX (TypeScript/React) and shipped it in a merged pull request.
- **The Rust Programming Language Book**: updated the spawn example, included in the **2nd (2023) and 3rd (2026)** No Starch Press paper editions (**135K+ copies sold**).

ACHIEVEMENTS AND AWARDS

- **Winner, Cloud Run Hackathon, Hong Kong (2022)**; **Winner, GCP Serverless Hackathon India (2021)**.
- **Top 8%/83K**, Google KickStart Round F (2021); **Global Rank 6129**, Google Code Jam Round 1 (2022).

SKILLS

AI and Agentic: LLMs (Claude, GPT), Agent Orchestration, Tool Use, RAG, Vector Databases, Prompt Engineering, LLM Evals, Guardrails, Forward Deployed Engineering, ClickHouse, DataHub.

Languages: Go, Java, Rust, C++, Python, TypeScript, JavaScript, Kotlin, Dart, SQL, Bash.

Systems and Architecture: Distributed Systems, System Design, Microservices, Scalability, Event-Driven Architecture, REST APIs, gRPC, GraphQL, Kafka, Redis.

Data and Infrastructure: PostgreSQL, MongoDB, Elasticsearch, Kubernetes, Docker, AWS, GCP, CI/CD, Git, ODBC, JDBC.

Observability and Practice: Grafana, Prometheus, New Relic, On-call and Incident Response, Code Review, Mentorship, Test-Driven Development.

EDUCATION

Guru Gobind Singh Indraprastha University, New Delhi, India

Master of Computer Applications, CGPA 8.92/10 (89.2%). Bachelor of Computer Applications, CGPA 8.11/10 (81.1%), Graduated 2020.
